

Certificate N. EN 1411

ENVIRONMENT POLICY

The **Chem.Ma srl** company intends to conduct its business in an optimal way for its employees and respecting the environment, and strongly believes in the educational value of its commitment. For these reasons, it has decided to adopt an environmental management system compliant with UNI EN ISO 14001 that allows the company to control its work environments and the ecological acceptability of its activities.

The Management has developed an environment and safety policy that guides the conduct of the company's activities and the definition of objectives, targets and environmental and safety programs.

The Management undertakes to:

- protect the environment, preventing possible pollution;
- comply with all applicable laws and regulations relating to its environmental aspects, as well as any commitments freely undertaken in the environmental field;
- promotes the use of measures aimed at reducing the impact from climate change (eg transition from fossil energy to renewable energy sources);
- pursue the continuous improvement of the environmental management system by adopting technologies and processes that allow to reduce environmental effects to levels equivalent to those that correspond to the economically feasible application of the best available technology;
- evaluate the environmental aspects each year during the management review, define the related impacts and new targets;
- evaluate in advance activities, technologies, and services in order to correctly identify the environmental aspects, ensure their control and minimize their effects when possible;
- implement measures to significantly reduce environmental impacts, also proposing them to customers as an alternative to standard technologies. Inform and assist customers in their choices aimed at reducing environmental impacts;
- contain emissions and waste, with particular reference to potentially dangerous ones, starting from the source, and the generation of noise, at all times of work activities;
- encourage waste management according to a priority scale that privileges reuse, where possible;

Certificate N. EN 1411
